## ABOUT ME

I'm on a mission to help bring beauty and functionality to the world by working towards my potential as a developer, designer, and creator. As an artist early on, I actually resisted the trend towards digitalization. There was an element of authenticity that I was afraid would be taken away. I've since learned that taking that stance was a waste of time, and that the creative potential that i can express through utilizing digital art forms is exponentially greater. On top of exploring digital art, my curiosity and hunger to learn a variety of skills led me to complete the Full-Stack Web Development Bootcamp at Nashville Software School. While in this program I built two of my own fully functional personal applications that you can check out below. I believe these projects showcase my understanding of both client side and server side programming languages and strategies as well as my ability to solve complex problems. I think that my abilities to learn and problem solve matched with my lifelong pursuit of art, beauty and design will make me an effective addition to most dev/web design teams.

## SOLO PROJECTS

**Macro-Manage**
*NSS Front-End Capstone • May 2020*
https://github.com/DanielFuqua/Capstone
Macro-Manage is an app designed to help users catalog their favorite meals and calculate the macro-nutrients, from the meal down to the ingredient. Macro Manage displays a list of foods stored by users, with nutrient contents, and a list of meals that calculates the total macro nutrient content .

**Asana 26**
*NSS Full-Stack Capstone • August 2020*
https://github.com/DanielFuqua/Capstone-Full-Stack
A social app geared to help new yogis learn the 26 postures of Bikram (hot) yoga.
- Users can browse the different postures and get some instruction before ever walking into their first class, as well as connect with other yogis to ask questions and share their knowledge.
-Utilized React JS, Reactstrap, React Router for client side
-Utilized C# .NET Core, ASP.NET Core, SQL Server and Entity Framework for server side

## EDUCATION

**Nashville Software School • 2020**
Web Development Bootcamp

**The University of Texas, Austin • 2008-2012**
Studio Art and Digital Media

## TECHNICAL EXPERIENCE

**Nashville Software School | *2020***
*Software Developer*

*Intensive, hands-on 6 month full-stack software development program creating applications in team based environments and individually using modern technologies.*

Technologies Used:
- Built single page applications with HTML5, CSS3, JavaScript, Bootstrap
- Learned functional React including hooks, styling with React Bootstrap
- Utilized Git and GitHub for version control and to facilitate collaboration when working remotely and on teams

## PROFESSIONAL EXPERIENCE

**Uhaul Moving & Storage, 2019 - 2020**
*Sales Representative*
- Ensured superior customer experience by addressing customer concerns, demonstrating empathy and resolving problems on the spot
- Managed wide variety of customer service and administrative tasks to resolve customer issues quickly and efficiently
- Routinely answered customer questions regarding merchandise and pricing
- Operated a POS syestem to itemize and complete customer purchass

**Cryptocurrency Trader, 2014- present**

*Independent Trader*
- Participated in ICO's (fundraisers aka initial coin offerings) such as
  - *Tezos* - an open-source platform for assets and applications
  - *Basic Attention Token* - a crypto native to the Brave internet browser, developed by JavaScript's own Brendan Eich
  - *RNDR* - a tokenized distributed GPU rendering network & marketplace built on Otoy's OctaneRender
- Accurately identified times to sell/buy, including selling off considerable portion of assets at the market's peak value of $20,000/BTC in 2017, yielding a 7,900% ROI for those BTC
- Entered into a partnership in 2019 with Cryptium Labs, a security-oriented proof-of-stake validator, offering staking services for the *Tezos* network. This partnership is still active and Tezos earnings at present time have yielded a ROI of  504%
